# JAMIE DURIE FOR B+N<sup>TM</sup>

B+N Industries is honored to introduce a special collaboration with international award-winning designer and author, Jamie Durie.

Durie and his team have created a unique design language called “transterior”: creating seamless transitions between the indoors & out. This philosophy of taking the outdoors inside, and the indoors outside, forges a greater connection to nature in a sophisticated and carefully curated environment inspired by nature and natural elements and textures.

Our acclaimed Infused Veneer and Iconic Panel Collections are a perfect vehicle to translate Jamie’s vision of imbuing interior spaces with the natural world. The result: a collection that will dramatically and elegantly transform spaces – all with a symbiotic relationship of imagery and patterns driven by design and created by nature.

# JAMIE DURIE FOR B+N: CHAIN OF PEARLS

The succulent, Chain of Pearls (*Senecio rowleyanus*), when found in its natural habitat of southwestern Africa, trails along the ground, rooting where it touches and forming dense mats. When cultivated, it usually cascades over walls and fences, creating a natural and unique drapery pattern. Shown here in Matte White. The Chain Of Pearls Pattern can be used as single panels, but if used along a wall, it is a two-panel repeat (starting from left to right here).

# REX RAY FOR B+N<sup>TM</sup>

Rex Ray's artwork ranges from collage on paper, canvas and resin boards to digital work. Ray's work is made entirely by hand. The collages are made with hand-painted and printed papers hand cut with scissors. His work combines a mid-century modern aesthetic with psychedelic color palette and shapes. Ray is known for popularizing the use of high-gloss resin panels – encasing his colorful, graphic collage designs in a gorgeous glossy layer of resin.

Ray's collages, paintings and design work have been exhibited at galleries and museums, including The San Francisco Museum of Modern Art, San Jose Museum of Modern Art, The Crocker Museum in Sacramento, and Museum of Contemporary Art in Denver.

Abstract and handcrafted, with a retro-futuristic feel, Rex Ray's work is always identifiable, whether seen on museum or gallery walls, in hip restaurants and boutique hotels — or on book, CD covers or rock posters. He has worked on a wide range of custom projects for Apple, Dreamworks, Swatch and David Bowie among others.

We at B+N Industries are proud to have his inimitable talent forged into our lines of Infused Veneer<sup>TM</sup> Panels, carved relief Iconic Panels<sup>TM</sup>, and a new line of wood furniture. Rex Ray's feel for wood grain, pattern, and shape melds perfectly with the warmth and graphic quality of these exclusive product lines. Whether used in retail, hospitality, or contract applications, this collection will be sure to bring an impactful and individualistic aesthetic to any interior.

## Fire Rated Core Panels

### -960

Iconic panels have been tested with Underwriters Laboratories, Inc. to determine the fire and smoke characteristics. Iconic panels can be ordered to comply to NFPA Class A / UBC Class I. Our stock mdf complies to NFPA Class C / UBC Class III.

**Class A / UBC Class / Minimum order: 10 panels**

Please contact sales for additional charges.

## Mounting Hardware

While the panels can be screwed directly to walls, we recommend the use of Panel Cleats that come with all panels. Panels are attached to the wall by using extruded aluminum mounting hardware, (Panel Clip®).

Panels are shipped with Panel Cleats and Wall Cleats, unless otherwise specified.

**NOTE: All Panels are shipped with Panel Clips included for the panel to be installed vertically, (46"w x 96"h). For any other installation, such as panels hung horizontally (96"w x 46"h), contact your sales rep for horizontal panel mounting options.**

## Pre-installed Puck Inserts To Accept Puck Hardware

We recommend the Puck System to accessorize your panels, though any of our systems will work on Iconic. The Panels are pre-drilled with threaded Puck inserts that accept the Puck Set Screw and Puck itself.

Inserts are pre-installed before your order is shipped. The spacing for the Pucks is 11 1/2" on center horizontally, and 12" on center vertically.

You can have any number of Puck inserts pre-installed in your panel, up to a maximum of 32.

Indicate the locations that you would like to have Puck inserts on each panel.

# The Puck System For Shelving and Merchandising For Use On Iconic Panels

## Puck Fundamentals

Pucks are screwed into the pre-installed Puck Inserts with a Puck Set Screw. The Aluminum Spacer provides the perfect distance for Puck hardware pieces to slip over the Puck. The sides of the spacer are flat to keep the accessories oriented vertically.

## Puck Pegouts

Pegouts lift a sign-holder or glass off the surface of a panel and secure it with Pucks. They can also be used for hanging mannequins.

**Note:** All pegouts are satin anodized aluminum unless otherwise noted. Pegouts are tapped for 1/4 - 20 screw on both

ends. You must order a Puck and two Puck Set Screws (one to attach the pegout to the Puck Panel, the other to attach the Puck to the Pegout to hold the graphic). See page 90 for Pucks and Puck Set Screws.
